

TUNDRA SUSTAINABLE FRONTIER FUND

MONTHLY UPDATE
JULY 2025

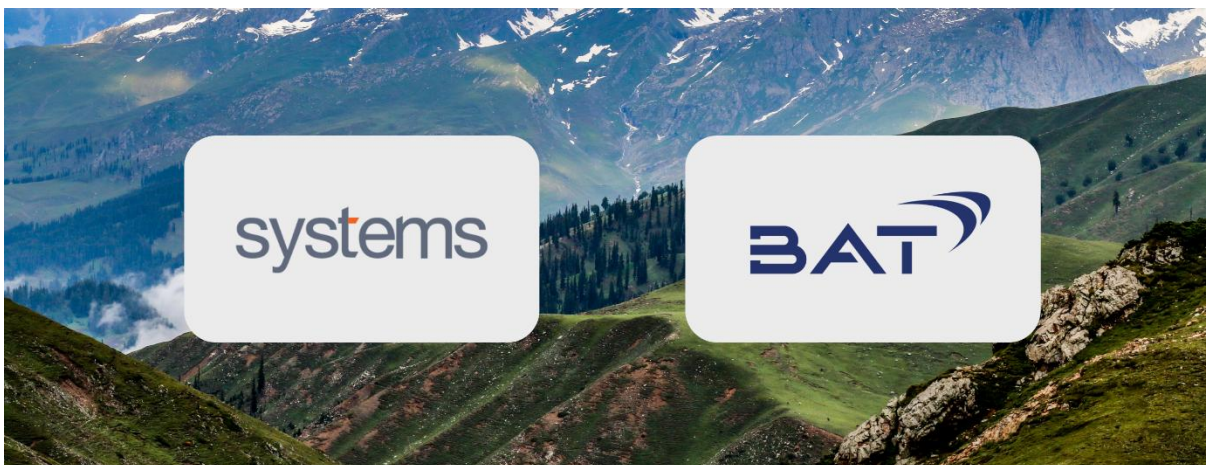

TUNDRA
FONDER

STRONG MONTH DRIVEN BY KEY HOLDINGS IN PAKISTAN AND BANGLADESH

In USD the fund rose by 8.2% during the month (EUR: +11.0%), compared to an increase of 7.0% for the MSCI FMxGCC Net TR (USD) (EUR: +9.9%), and 1.9% for the MSCI EM Net TR (USD) (EUR: +4.7%). In terms of absolute return (measured in USD), Pakistan was the single largest positive contributor (+4.2% absolute contribution), followed by Bangladesh (+2.3%) and Egypt (+1.3%), while Philippines (-0.2%), and Kazakhstan (-0.1%) were the only sub-portfolios to detract. Relative to our benchmark, the main positive contributions came from our overweight and stock selection in Pakistan (+3.7% relative contribution), Bangladesh (+2.3%), Egypt (+1.4%), Nigeria (+0.7%), and Sri Lanka (+0.5%). These more than offset the continued weak stock selection in Vietnam (-4.2%), and our underweight in Morocco (-1.1%).

Among individual holdings, the strongest positive contributors were Pakistani Systems (8% of the portfolio), which rose by 28%, and Bangladeshi BRAC Bank (6% of the portfolio), which soared by 39%. Systems rallied primarily on the announcement of its acquisition of an international business services (BPO) company, combined with news of a significant service agreement with Accenture. This marks a notable step towards commercialising a new type of service, which could have a meaningful impact on the company's future earnings growth. BRAC Bank led the advance in a reawakened Bangladeshi equity market. We interpret the rally in Bangladesh as a response to the country's (expected) improvements in macroeconomic indicators, and signs that higher-quality banks are gaining significant market share. During the month, we observed notable foreign investor interest in the bank. The main detractor was Philippine company Century Pacific (3% of the portfolio), which fell by 10% amid a weak domestic equity market in July.

KEY MARKET DEVELOPMENTS

Easing concerns over US tariff measures provided broad support to the markets throughout the month. Pakistan, Vietnam, Bangladesh, and Sri Lanka all concluded agreements in line with the more optimistic expectations among market participants. However, we note the persistence of the more discretionary elements of the negotiations, with both Brazil (50% proposed tariffs) and India (25% + additional 25%) temporarily falling out of favour with Trump for reasons likely beyond trade balances alone.

Monthly Update July 2025

Tundra Sustainable Frontier Fund

Vietnam rose by 15% during the month. The resolution of the tariff discussions was a key factor, with the US and Vietnam ultimately agreeing to a 20% tariff rate—down from the initial proposal of 46%. The strained relationship between the US and India (currently facing tariffs of 50%)—Vietnam’s most significant competitor for foreign direct investment—was also a supportive element. However, part of the rally in Vietnam could be characterised as lower quality, with gains driven primarily by more speculative and volatile names, such as the Vingroup companies and brokerage firms. By comparison, the broader domestic VN Index rose by “only” 9% over the month. Nevertheless, appetite for Vietnamese equities has clearly returned, and sentiment has improved markedly.

Another strong performer was Pakistan, which climbed 11% during the month. The US and Pakistan agreed on a 19% tariff rate for Pakistani exports—at the lower end of projections among more optimistic analysts. Talks of potential US investments in Pakistan’s commodity sector were also well received. Positive economic data, including the country’s first current account surplus in 14 years and a credit rating upgrade by Fitch, further improved sentiment. The acquisition of an international BPO firm by flagship company Systems (up 28% over the month) also boosted confidence among local investors.

Risks

Investments in financial instruments are associated with risk and an investment may both increase and decrease in value or even become worthless. Historical returns are no guarantee of future returns. International investments, particularly those on new markets in developing and growth countries (such as Eastern Europe (including Russia), Asia, Latin America and Africa), are normally associated with a higher level of risk than investments in Swedish or other developed markets' securities. These risks include both political and economic uncertainty in other countries as well as currency fluctuations. These risks are particularly high on new markets since these countries may have relatively unstable governments and immature markets and economies.
