## **Fund managers report**

### **The Fund's performance**

The Fund grew by 6.37% (Fund share class A SEK) in the first half of 2016. The fund's benchmark MSCI Pakistan Daily Net Total Return (SEK) grew by 13.79% during the same period. The fund's underweight in index heavy materials, financials and utilities amid overweight in consumer staples remained the main reason of relative under performance. Consumer Discretionary however contributed positively to the relative performance.

### **The Fund's net assets development**

#### **The Fund's net assets development**

Assets under management at June 30, 2016 amounted to SEK 922 million, which represents a decrease of SEK-238 million compared with SEK 1.160 million at 31 December 2015.

The value of issued fund shares amounted to Class A SEK 74 million, Class C SEK 0, Class D SEK 40 million and Class F SEK 3 million. The value of redeemed fund shares amounted to Class A SEK -391 million, Class C SEK -100 000, Class D SEK 0 and Class F SEK 4.

The value of the total change of fund shares during the period hence amounted to Class A SEK -317 million, Class C SEK -100 000 and Class D SEK 40 million and Class F SEK -1 million.

### **Market**

The market in Pakistan increased by 13.79% during the first half of 2016. The market had a weak start of the year where falling commodity prices resulted in a global equity rout and significant outflows from the market. However, following the positive outcome of MSCI's review of upgrading Pakistan from Frontier index to Emerging markets index, a renewed enthusiasm towards Pakistan's market was established. Foreign flows turned positive to the tune of USD 74m in June alone after the MSCI announcement, compared to negative flows of USD 118m in the first five months of the year. The improving security situation and stabilizing macro-economic indicators in the wake of lower oil prices and a pickup in Chinese investment under the CPEC program added to the positivity.

### **Outlook**

Post MSCI review, Pakistan is likely to see continued foreign inflows. The fund has kept its overweight position in off benchmark bets in Consumer staples, Healthcare and Information Technology and increased the weight in Financials. The underweight in Materials and Utilities constitutes risk to the relative performance if foreign buying propels the stretched valuations further up.

### **Derivatives**

According to the fund statutes, the fund has the right to trade in options, futures and other derivatives, and the right to lend securities. The fund had no exposure to derivatives, or similar instruments during the period.

Mattias Martinsson, CIO and Portfolio manager.
