

Annual Report

Tundra Pakistan Fund

515602-4787

2018-01-01 - 2018-12-31

This is a translated copy of the Swedish original. If any conflict occurs in the translation the Swedish version will prevail.

Disclaimer: The state of the origin of the fund is Sweden. This document may only be distributed in or from Switzerland to qualified investors within the meaning of Art. 10 Para. 3,3bis and 3ter CISA. The representative in Switzerland is OpenFunds Investment Services AG, Seefeldstrasse 35, 8008 Zurich, whilst the Paying Agent is Società Bancaria Ticinese SA, Piazza Collegiata 3, 6501 Bellinzona. The basic documents of the fund as well as the annual report may be obtained free of charge at the registered office of the Swiss Representative.

Management report

This is a translation of the Swedish original. If any conflict occurs in the translation the Swedish version will prevail. The Board of Directors and the CEO of Tundra Fonder AB, 556838-6303, hereby submit the Annual report for the period 2018-01-01 – 2018-12-31 for Tundra Pakistan Fund, 515602-4787.

General development

The fund's performance

Tundra Pakistan Fund fell 27.31% (SEK) during 2018, vs the fund's benchmark that fell 29.61% (SEK).

The fund's net assets development

Assets under management at December 31st 2018 amounted to SEK 288.7 million, which represents a decrease of SEK 171.2 million compared to SEK 459.9 million at December 31st 2017.

The value of issued fund shares for share class A amounted to SEK 291.0 million, SEK 0 million for share class C, SEK 5.6 million for share class D and SEK 0 million for share class F while the value of redeemed fund shares for share class A amounted to SEK 302.5 million, SEK 0.2 million for share class C, SEK 9.8 million for share class D and SEK 22.9 million for share class F.

The net issued amount hence amounted to SEK -11.5 million for share class A, SEK -0.2 million for share class C, SEK -4.2 million for share class D and SEK -22.9 million for share class F.

Market development

2018 was a turbulent year in Pakistan. Economic and political turbulence characterized the year. The currency lost just over 20% against the US dollar as concerns about the weak current account increased. The election, which was held in July, rendered in a big surprise when none of the two large traditional parties won. Instead, opposition party PTI won a surprising victory and formed government along with independent members. The new government has announced far-reaching reforms focusing on increasing Pakistan's export base. The unexpected decision not to immediately approach the IMF for a support package, however, created uncertainty in the market which ended the year weakly. A number of announced loans from neighboring nations, including Saudi Arabia, the United Arab Emirates and China failed to convince investors. However, we are positive about the announced economic policy. It requires a little more patience but has the potential to give more long-term positive effects.

Fund management and outlook

Tundra Pakistan Fund fell during the year with 27.31% (SEK) after fees, which was slightly better than the fund's benchmark index (MSCI Pakistan Net, SEK) which fell 29.61% during the year. The main reason for the fund developing better than the benchmark was the underweight in Banking & Finance and in the Energy sector. Negative contributions were received from the fund's overweight in the Cement sector. The outlook for 2018 looks interesting. The Pakistani rupee is cheap after the devaluations. This creates the conditions for an improved current account and thus a more stable currency development in the future. Announced foreign direct investment also has the potential to create a positive sentiment in the market. The profit estimates in currency-sensitive sectors have been revised down, while the valuation of the market as a whole is lower than average over the past five years. Pakistan has the potential to surprise positively during the year to come.

Objectives and investment policy

The fund management company's management of the fund is intended to generate financial exposure to economic development in Pakistan and to provide the unit holders with a maximum long-term return on their invested capital. The performance is benchmarked against MSCI Pakistan Net.

The fund takes into account aspects such as corporate governance, environmental and social issues as part of the investment process. The principles from international guidelines are applied (UN Global Compact, Tripartite Declaration of Principles concerning Multinational Enterprises and Social Policy and OECD Guidelines for Multinational Enterprises). Companies that are involved in controversial weapons are also excluded.

The fund is managed by an investment committee but with Tundra Fonder's Chief Investment Officer, Mattias Martinsson, as the lead portfolio manager.

Risks in the fund at year end

The fund has a vast majority of its assets invested in Pakistan. A worse than expected development of the Pakistani economy or the earnings growth among listed companies in the country constitute the primary risk. The fund does not hedge its holdings to currency fluctuations which may affect returns adversely in case the Pakistan Rupee weakens.

Derivatives

According to the fund rules, the fund has the right to invest in derivative instruments in order to make the management more efficient. The fund had no exposure to derivatives during 2018. To calculate the total exposure, the fund applies the so-called commitment approach on derivative instruments.

¹⁾ Standard deviation is defined as the standard deviation of the fund's return including any dividends. The calculation is based on monthly data during the past 24 months.

²⁾ Standard deviation is defined as the standard deviation of the benchmark's total return. The calculation is based on monthly data during the past 24 months.

³⁾ Tracking error is defined as the standard deviation of the difference in return between the fund and the benchmark. The calculation is based on monthly data during the past 24 months.

Accounting principles and valuation of financial instruments

Amounts stated are in number of SEK if nothing else stated.

Accounting principles

The fund applies the Mutual Funds Act, 2004:46 and the Financial Supervisory Authority's regulation of mutual funds (FFFS 2013:9) and applies the Swedish Investment Fund Association's guidelines.

Valuation of financial instruments

The financial instruments are valued at market value according to the following order.

1. Financial instruments traded on an active market will be valued on the closing price at December 31st 2017. If this is a bank holiday, the most recent trading day prior to the bank holiday will be used.
2. If the financial instrument is not traded on an active market, the market value is derived from information from similar transactions that have taken place under market conditions.
3. Unless method 1 or 2 can be used, or are misleading, the market value is determined by a well-established valuation model.

Note on unlisted holdings

Since the Fund may invest in securities that are restricted, unlisted, traded infrequently, thinly traded, or relatively illiquid, there is the possibility of a differential between the last available market prices for one or more of those securities and the latest indications of market values for those securities. The Fund has procedures, approved by the Board of Directors of the Company, to determine the fair value of individual securities and other assets for which market prices are not readily available (such as certain restricted or unlisted securities and private placements) or which may not be reliably priced. Some methods for valuing these securities may include: fundamental analysis (discounted cash flow etc), sum-of-the-parts and market prices derived from similar transactions. The application of fair value pricing procedures represents a good faith determination based upon specifically applied procedures. There can be no assurance that the Fund could obtain the fair value assigned to a security if they were able to sell the security at approximately the time at which the Funds determine its NAV. There is also a probability that the fairvalue assigned to these securities significantly underestimates the actual value of these securities.

In accordance with the UCITS regulation, the Fund may invest up to 10% in unlisted securities if these are to be listed within 12 months. Historically, a limited number of such investments have been carried out on behalf of some of the fund. Since 2018 however, no additional investments are made in unlisted securities. If unlisted securities are not listed within 12 months, the Fund should divest the securities in a way beneficial to the unitholders. Due to the nature of unlisted holdings, the process of selling those securities may be prolonged for a significant time. Tundra Pakistan Fund held one position, Daewoo Express, as of December 31st 2018 whose listings/divestments has been delayed beyond the 12-month stipulated time period due to reasons outside the funds' control. The portfolio weight of this holding constituted 3.27% of the fund's net assets. Negotiations for divestment are ongoing but there are risks of significant further delays until the assets are either sold or listed. The Fund Company has gradually reduced the assigned valuation of the holding as repeated delays indicated the chances of a successful listing or divestment has gradually decreased. It should in particular be highlighted that there are several layers of uncertainties. Even an agreed transaction between two parties could mean the realized value might not be possible to repatriate since Central bank approval of repatriation is needed and it is not certain that such approval is given. This risk has during 2018 increased significantly given significant strains on Pakistan's foreign currency reserves experienced during 2018. In addition, it is further not unusual to see a transaction being contested within the Pakistani court system, sometimes due to legitimate concerns by a third party whose rights might be affected, sometimes as a form of blackmail. The structure of the Pakistani court system is such that even a perfectly legitimate transaction, through stay orders, can be delayed for several years and ultimately fail as a result of third party intervention. Such delays can meanwhile impact the financial viability of the company for example through non-availability of credits etc, which might eventually mean assumptions of financial forecasts are incorrect. These layers of uncertainty mean that absolute certainty of what value will be realized can only be achieved once funds are repatriated. Should the transaction be successful or should the company become listed it could however result in a positive one-time effect on the NAV of the funds. All factors taken into consideration, including best efforts of assuring an as correct valuation at all times, it is possible that the unit price of the funds at some point during the next 12 months may experience a one-time impacts where the downside could be maximal

the assigned valuation and the upside could be potentially even higher. We thus caution investors to take this into consideration before buying or selling fund units. As soon as the transaction is concluded we will update on our website and in the monthly comments. It should also be emphasized that the weight in the NAV and hence also the impact on the NAV as a result of any future transaction or listing depends on the assets under management in the Funds and any future major redemption from the Funds may escalate the impact in a substantial manner.

Daewoo Express is the largest and one of the few organized transportation companies in Pakistan. The company owns approximately 350 buses and offers intra city services as well as long distance transportation throughout Pakistan. More information about the company: www.daewoo.com.pk.

Key performance indicators

The fund follows the Swedish Investment Fund Association's guidelines on key performance indicators.

Taxation in Pakistan

With current legislation, Pakistan is charging a capital gains tax on short-term trading. From July 1, 2017 the following capital gains taxation rules apply: For holdings acquired before July 1, 2016 capital gains tax is 15% on share gains for holdings held for a shorter period than 12 months, 12.5% for holdings held 12-24 months and 7.5% for holdings held 24-48 months. For holdings held for more than 48 months, the tax is 0% if acquired before July 1, 2012, otherwise 7.5%. The tax is calculated according to current legislation per holding according to FIFO (first-in first-out method). For holdings acquired after July 1, 2016 a 15% flat capital gains tax on all positions are applicable. The fund company has contracted KPMG in Pakistan as tax consultant and will calculate and reserve daily for deferred and realized tax in the fund jointly. This means that unit holders may not pay local Pakistani tax despite the fact that their unit value has risen, and unit holders may pay local Pakistani tax even though their unit value has decreased. It may also mean that previously reserved taxes are returned to the fund without change in underlying holdings. Since the introduction, as of July 1, 2010, the tax has been revised on several occasions and may change again in the future, which implies a further risk.

Remuneration

Remuneration and benefits to employees has been calculated based on the Company's principles which has been approved by the Board of Directors. During the financial year the Company applied a calculation based on that 20 percent of the Company's profit before tax is deposited as variable remuneration to employees. In addition, the Company may make exceptions for individuals who contributed positive from a risk adjusted perspective as long as the Company does not run the risk of violating regulatory capital requirements or otherwise threaten to put the Company at a disadvantage situation.

Each year the Board of Directors revises the Company's remuneration policy. During the year minor linguistic adjustments has been made as well as adding reference to new law. These changes have not resulted in any substantial changes of the remuneration policy.

Please refer to the Company's website for the current remuneration policy:

<http://www.tundrafonder.se/en/compliance-2/>

Benefits paid to all employees in 2018	Amount in SEK	Number of employees
Fixed salary	8 897 940	18
Variable remuneration to employees who are included in the number of employees and which have not been classified as special regulated staff	0	
Total: Fixed salary and number of employees	8 897 940	18
Benefits paid to particular regulated staff 2017		
a) employees in senior strategic positions	2 362 518	2.5
b) employees with responsibility for control functions. Outsourced functions	0	0
c) risk takers	2 936 851	4.5
d) employees whose total compensation is equal to, or greater than, the total remuneration to someone in senior management	0	0

The risk function has been outsourced to ISEC Services (org.no 556542-2853), which the Company refers to regarding remuneration to risk function employees.
