TUNDRA Frontier Africa Fund, Class A, SEK

TUNDRA FONDER AB, Reg.no.: 556838-6303

ISIN: SE0005 188 091

OBJECTIVES AND INVESTMENT POLICY

The fund is an equity fund with a particular emphasis on investments in transferable securities issued by companies located in Africa or that conduct their principal operating activities in Africa. The fund company's management of the fund is intended to generate diversified financial exposure to the economic development in Africa and provide the unit holders with a better return compared to the MSCI EMF Africa excluding South Africa Net Index (SEK) with equal or lower risk.

The fund's assets may be invested in transferable securities, money-market instruments, fund units, derivative instruments and accounts with credit institutions. At least 90 percent of the net asset value of the fund must be invested in equities and equity-related transferable issued by companies located in Africa or that conduct their principal operating activities in Africa. Principal activities means more than 50 percent of the company's gross income. Notwithstanding the above restrictions, the fund may always hold the cash and cash equivalents necessary to conduct management of the fund, but to a maximum of 20 percent of the net asset value of the fund.

The fund's assets may be invested in derivative instruments with such underlying assets as those specified in 5:12, first paragraph, of the LVF. The fund may invest up to 10 percent of the net asset

value in other funds. The investment strategy is diversified and thus not limited to any particular sector. The fund will only to a limited extent invest in commodity companies.

The fund takes into account aspects such as corporate governance, environmental and social issues as part of the investment process. The principles from international guidelines are applied (UN Global Compact, Tripartite Declaration of Principles concerning Multinational Enterprises and Social Policy and OECD Guidelines for Multinational Enterprises). Companies that are involved in controversial weapons are also excluded.

The share class does not pay dividends. The subscription and redemption currency of this share class is SEK.

Recommendation: this fund may not be appropriate for investors who plan to redeem invested capital within 5 years. Requests to subscribe to or redeem fund units can be made on any Swedish banking day before 2.30pm CET.

Subscriptions take place at the price established on the first banking day following the day on which the request is received and capital has been credited to the fund's bank account. Redemptions take place at the price established on the first banking day following the day on which the fund management company receives the request.

RISK AND REWARD PROFILE

1	2	3	4	5	6	7
---	---	---	---	---	---	---

The risk and reward indicator illustrates the link between risk and potential returns from an investment in the fund. If the fund's history is shorter than five years relevant index has been added to the calculation.

This fund is in risk category 6, which means a high risk of increases and decreases in the value of units. Risk category 1 does not mean that the fund is risk free. The fund may over time move towards the left or right of the scale. This is because the indicator is based on historical data that may not be a reliable indication of future risk and reward.

The fund invests mainly in companies listed in Africa. This is generally associated with very high risk, but also the potential for very high reward. The indicator mainly reflects rises and falls for the shares in which the fund invests.

The indicator illustrates the most substantial risks in the fund, but not the risk, under extreme circumstances on the stock markets, of not being able to deposit or withdraw an investment from the fund within the indicated time (liquidity risk).
