

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

TUNDRA SUSTAINABLE FRONTIER FUND, Class T, NOK

TUNDRA FONDER AB, Reg. no.: 556838-6303

ISIN: SE0020 999 654

Actively Managed UCITS-fund

## OBJECTIVES AND INVESTMENT POLICY

The objective of the fund is to provide financial exposure to economic development in emerging markets and frontier markets and to provide its unit holders with a maximum long-term return on their investment. The investment strategy is global and diversified and thus not limited to any particular sector. The benchmark index is MSCI Frontier Markets xGCC Net Total Return Index (NOK).

At least 80 percent of the net asset value of the fund must be invested in equities or equity-related transferable securities issued by companies that are located in, or conduct their principal operating activities in, emerging markets and/or frontier markets. The fund may invest up to 20 percent of its net asset value in equity or equity-related transferable securities issued by companies that are classified by MSCI as developed markets. Notwithstanding the above restrictions, the fund may always hold the cash and cash equivalents necessary to conduct management of the fund, but to a maximum of 20 percent of the net asset value of the fund.

The fund takes into account aspects such as corporate governance, environmental and social issues as part of the investment process. The principles from international guidelines are applied (UN Global Compact, Tripartite Declaration of Principles concerning Multinational Enterprises and Social Policy and OECD Guidelines for Multinational

Enterprises). The fund does not invest in companies with an exposure exceeding five percent (defined as percent of total turnover) to sectors such as alcohol, pornography, tobacco, weapon, commercial gambling, extraction/production where the raw material mainly consist of fossil fuels or nuclear power. Companies that are involved in controversial weapons are excluded.

The Fund's assets may be invested in derivative instruments with such underlying assets as those specified in 5:12, first paragraph, of the LVF. The fund invests primarily in stocks and derivatives may be used as a complement. The fund may invest up to 10% of the net asset value in other funds.

The share class does not pay dividends. The subscription and redemption currency of this share class is NOK. Recommendation: this fund may not be appropriate for investors who plan to redeem invested capital within 5 years.

Requests to subscribe to or redeem fund units can be made on any Swedish banking day before 2.30pm CET. Subscriptions take place at the price established on the banking day the request is received and capital has been credited to the fund's bank account. Redemptions take place at the price established on the banking day on which the fund management company receives the request.

## RISK AND REWARD PROFILE

1	2	3	4	5	6	7
---	---	---	---	---	---	---

The risk and reward indicator illustrates the link between risk and potential returns from an investment in the fund. If the fund's history is shorter than five years relevant index has been added to the calculation.

This fund is in risk category 5, which means a high risk of increases and decreases in the value of units. Risk category 1 does not mean that the fund is risk free. The fund may over time move towards the left or right of the scale. This is because the indicator is based on historical data that may not be a reliable indication of future risk and reward.

The fund invests mainly in companies listed on emerging markets and frontier markets. This is generally associated with very high risk, but also the potential for very high reward. The indicator mainly reflects rises and falls for the shares in which the fund invests.

The indicator illustrates the most substantial risks in the fund, but not the risk, under extreme circumstances on the stock markets, of not being able to deposit or withdraw an investment from the fund within the indicated time (liquidity risk).

The credit risk is not fully reflected in the indicator. Credit risk means the risk that the creditworthiness of an issuer or counterparty deteriorates, which may affect the value of the security. The fund managers assess the creditworthiness of the investments on an ongoing basis.

The fund may be exposed to operational risk as a result of the fixed market's lower transparency and standardization. This is especially true in the event of market turmoil and possible credit events. Operational risk is the risk of loss due to lack of internal routines or external factors such as legal and documentation-related risks as well as risks as a result of trading, settlement and valuation routines.

## CHARGES

### One-off charges taken before or after you invest

Entry charge	5.00%
--------------	-------

This is the **maximum** that might be taken out of your money before the proceeds of your investment are paid out.

### Charges taken from the fund over a year

Ongoing charges	1.02%
-----------------	-------

### Charges taken from the fund under certain specific conditions.

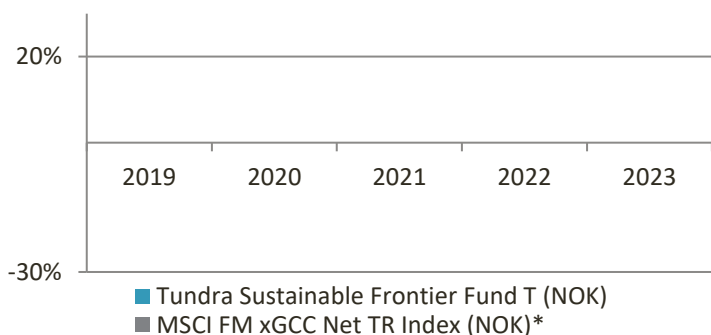

Performance fee	None
-----------------	------

The ongoing charges you pay are used to pay the cost of running the fund, including the cost of marketing and distribution. These charges reduce the potential return of your investment.

The entry charge shown is a maximum figures. **At present, the entry charge is 0 percent.** Ask your financial advisor about entry and exit charges.

The share class was launched on 1 December 2023. There is therefore limited historical data available to calculate the ongoing charges. The ongoing charges are estimated to coincide with the management fee. The ongoing charges may vary slightly from year to year.

## PAST PERFORMANCE (NOK)

Performance is calculated after fees. Values are calculated in NOK.

Past performance is not necessarily an indicator for future performance.

The share class was launched on 1 December 2023. There is thus insufficient data to provide a useful indication of past performance to investors.
